

Electronic signatures.

Efficient. Secure. Forward-looking.

The three signature standards

SES

Simple electronic signature

For documents without any formal legal requirements and with low liability risk.

Examples of use: internal documents, supplier orders

AES

Advanced electronic signature

For documents without any formal legal requirements and with medium liability risk.

Examples of use: service contracts, employment contracts

QES

Qualified electronic signature

For documents with (or without) formal legal requirements and with high liability risk.

Examples of use: audit reports, temporary work contracts

Your advantages

Efficient

Design your processes to be time-saving, paperless and without media discontinuity.

Secure

Ensure the authenticity of the signature and the integrity of the documents.

Forward-looking

Build the foundation for further trusted digital services.

Arrange your personal consultation. We're here to help.

Electronic signatures. Efficient. Secure. Forward-looking.

The signature model to suit your needs

Signature service

For private individuals and SMEs with a low volume of signatures.

No integration effort. Documents are uploaded on the web and signed via smartphone or desktop.

The first 5 signatures are free: sign.swissid.ch

Integrated signature solution

For SMEs and large companies with a high volume of signatures.

Integration via REST API or installation on-premise or in a private cloud.

Option of white labelling and the use of own identities.

Why choose SwissSign?

Signature complies with Swiss law (ESigA).

All data stored in Switzerland.

Data protection based on the FADP and the GDPR.

Issued by a Swiss trust service provider.

Identification complies with EPRA, ESigA, ETSI and FINMA standards.
